"When quality cannot be compromised"

When it comes to longevity concrete is the solid solution. The smooth flat surfaces are ideal for mounting standard hardware. Bolt holes can be cast in or easily field drilled. Woodpecker or insect damage, even rot just simply cannot happen to concrete. You and your customers get the added benefit of a clean attractive visual profile that our engineered product provides.

Substation area lighting and power distribution

Distribution Pole with Switch

Line Rehabilitation - Wood Pole Replacement

Customer owned switch pole

Street Lighting Pole

The smooth flat surfaces are ideal for mounting standard hardware. Bolt holes can be cast in or easily field drilled. Woodpecker or insect damage, even rot just simply cannot happen to concrete. You and your customers get the added benefit of a clean attractive visual profile that our engineered product provides.

Many of our Utility customers take advantage of our large inventory. We stock truckload quantities on blanket orders ready for next day shipping.

Strong Long-Lasting Prefabricated Maintenance-free
