

## KEY BENEFITS

- ❖ Standard vaults have 6" thick, steel reinforced, solid concrete walls.
- ❖ Ability to withstand the **250 mph winds generated** by an F-5 Tornado. LPMI follows the guidelines established by FEMA's National Performance Criteria for Tornado Shelters.

## FIRE

Vault doors are available in 2, 4 or 6 hour fire ratings. Many families and businesses lose valuable and irreplaceable items every year due to fire.

## THEFT

Our vault gives you peace of mind to know that while you're away, your possessions are protected.

## INSTALLATION

Installation can be done in a matter of hours. Our concrete vaults can be installed during the construction of a new structure or inside an existing structure. A clearance of 24" on all sides is needed for the placement in an existing structure such as:

- ❖ Show Rooms
- ❖ Retail
- ❖ Garages
- ❖ Storerooms & Warehouses, etc

Our vaults can be designed to meet your specifications and are available in a variety of styles.

## SOLID CONCRETE IS THE PERMANENT SOLUTION

Lonestar Prestress Mfg, Inc. manufactures a variety of concrete products:
